

DIPLOMA SUPPLEMENT Information

The Diploma Supplement was developed by the European Commission, Council of Europe and by UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international transparency and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.).

It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended.

This diploma supplement is free from any value-judgements, equivalence statements or suggestions about recognition. Information is provided in eight sections. Where information is not provided, an explanation will give the reason why.

Matricola: 5101735

Protocollo: 0403237

1. INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

1.1/1.2 Family Name / First Name:	FACCIO CHRISTIAN
1.3 Date(dd/mm/yyyy), place and country of birth:	01/03/2002, VALDAGNO (VI), ITALIA
1.4 Student identification (student code/personal identification number):	5101735 / FCCCRS02C01L551H

2. INFORMATION IDENTIFYING THE QUALIFICATION

2.1 Name of qualification:	FIRST-LEVEL DEGREE IN ECONOMIA DELLE IMPRESE E DEI MERCATI
Title conferred:	DOTTORE
2.2 Main field(s) of study:	033 - SCIENZE ECONOMICHE
2.3 Name and status of awarding institution:	UNIVERSITA' CATTOLICA DEL SACRO CUORE, MILANO Legally recognised, non-state.
2.4 Name of institution administering studies:	UNIVERSITA' CATTOLICA DEL SACRO CUORE, MILANO
2.5 Language(s) of instruction/examination:	ITALIAN

3. INFORMATION ON THE LEVEL OF THE QUALIFICATION

3.1 Level of qualification:	FIRST LEVEL DEGREE (FIRST CYCLE QF-EHEA / LEVEL 6° EQF)
3.2 Official length of programme:	3 YEARS
3.3 Access requirement(s):	ITALIAN HIGH SCHOOL DIPLOMA

4. INFORMATION ON THE CONTENTS AND RESULTS GAINED

4.1 Mode of study:	Full Time
--------------------	-----------

4.2 Programme requirements:

Data not available.

Through study programmes the Faculty Boards may redistribute up to 30-40 of the educational credits allocated by a given degree course programme subject to respecting the minimum laid down for each educational activity by the ministerial decrees on three-year and specialist degrees.

5. INFORMATION ON THE FUNCTION OF THE QUALIFICATION

5.1 Access to further study:

SECOND-LEVEL DEGREE COURSE; FIRST-LEVEL MASTER'S COURSE

5.2 Professional status:

The first-level degree is designed to turn out graduates who possess all of the tools necessary for carrying out active roles in business decision processes or decision processes that have repercussions of a business nature. The specific educational objective is to provide the students with the main tools needed for interpreting business phenomena through the understanding of theories, quantitative analysis techniques and the most up-to-date institutional references.

For this purpose, the programme addresses a broad array of subjects, bringing together a nucleus of business disciplines and the essential methodological aspects in relation to the study of law, history, and socio-political issues.

The business courses, which account for the bulk of the programme, will deal with the analytical and theoretical tools needed for analysing and understanding the functioning of the markets, firms and financial institutions, as well as the role of economic policy and its influence on the economic system and the decisions of economic agents. A large part of the programme will be dedicated to learning the methods needed for the quantitative analysis of business phenomena, with the accent placed not only on measurement, but also on economic forecasting techniques to be used as a support to decision-making by firms and financial institutions. The programme's specific educational objectives include:

- the study of the means with which firms and the markets operate, through analysis of the interactions that exist between decisions taken by individual firms and the functioning of the market in which the firms act, with the role of information having a significant role;
- the ability to take rational decisions for the account of firms in differing environments (e.g. productive sectors, international markets, financial markets and local systems), using the appropriate tools for measuring, reporting and processing the data related to the economic analysis of the markets;
- the capacity to analyse business problems by drawing on a range of disciplines with the appropriate use of knowledge and skills with reference to business, management, law, statistics-mathematics, history and sociology-psychology.

In terms of professional profile, the degree programme aspires to create applied economists who thus have a knowledge base for carrying out numerous jobs, including, for example, business economist, industrial economist, international markets analyst, financial economist, or economist specialising in the money markets.

There job possibilities for this type of degree are numerous both in Italy and abroad, and regard various areas of the manufacturing sector, the services sector and government.

The graduates will need to be able to speak and write effectively in the English language and a second language (French, German or Spanish). They will also need competent skills in communications and communications management, including with the technological tools. The first two years will be dedicated to basic studies. Thereafter, the student may elect special study with respect to one of the

Matricola: **5101735**

Protocollo: **0403237**

Diploma supplement: **FACCIO CHRISTIAN**

following specific themes:

- understanding subjects typically concerning finance and the markets;
- understanding the functioning of the international markets;
- understanding the functioning of a firm and the firm's business problems;
- quantitative methods applied to business.

The courses will be taught through significant use of interactive teaching methods with the use of the following active-learning tools to flank the traditional lectures: assignments, discussion of cases, analysis of current themes, seminars, meetings with entrepreneurs, managers and professionals of business/financial entities and systems.

The course programme also provides for apprenticeships and lab assignments at companies, economic organisations, public and private institutions, in Italy and abroad, where theoretical knowledge can be translated into applications.

The degree programme also includes the use of online platforms, where the student can find supplemental material and other references and contacts for further study of the materials covered in class/seminars and for preparation for the exams.

The core course work will conclude with an examination that will be graded on a scale of 30. The same may apply with respect to supplemental course work, for which qualifying exams may be provided.

The assessment of the student's understanding and acquisition of the materials (illustrated below through the European descriptors of the diploma) will be determined through individual testing (written exams and interviews), evaluation of group and individual projects, discussion of cases, and presentation of special-study reports.

The exams are structured so as to assess the critical reprocessing of the contents of the individual courses.

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

The Italian University System

(DM 509/99 and DM 270/2004)

Since 1999, Italian university studies have been fully reformed so as to meet the objectives of the "Bologna process". The university system is now organised on 3 cycles: the 1st cycle academic degree, that is the Laurea, grants access to the 2nd cycle, and the Laurea Specialistica/Magistrale, the main degree of the 2nd cycle, gives access to 3rd cycle doctorate programmes resulting in the degree called Dottorato di Ricerca. In addition to the mentioned degree sequence after the Bologna pattern, the system offers other degree programmes and related degrees both within the 2nd and 3rd cycle.

First cycle. Undergraduate studies consist exclusively in Corsi di Laurea-CL (1st degree courses) aimed at guaranteeing undergraduate students an adequate command of general scientific methods and contents as well as specific professional skills. General access requirement is the Italian school leaving qualification (Diploma di Superamento dell'Esame di Stato conclusivo dei corsi di Istruzione Secondaria Superiore), awarded on passing the relevant state examinations, after completion of 13 years of global schooling; also foreign comparable qualifications may be accepted. Admission to individual degree courses may be subject to specific course requirements. First degree courses last 3 years. The Laurea (L, 1st degree, and bachelor-level of the Bologna process) is awarded to undergraduates who have earned 180 ECTS credits. The L allows transition to the labour market, access to the civil service and/or regulated professions; it also grants access to all degree programmes of the 2nd cycle.

Second cycle. Postgraduate studies include A) Corsi di Laurea Specialistica/Corsi di Laurea Magistrale-CLS/CLM; B) Corsi di Master Universitario di 1° livello-CMU1.

A) CLS/CLM are aimed at providing postgraduates with an advanced level of education for the exercise of a highly qualified activity in specific areas. Access to CLS/CLM is by the Italian 1st degree (L) or a foreign comparable degree; admission is subject to specific course requirements determined by individual universities; workload: 120 ECTS credits; length: 2 years. The final degree, Laurea Specialistica/Magistrale-LS/LM (master-level of the Bologna process), is awarded to those graduates who, once satisfied all curricular requirements, have also defended an original dissertation in the final degree examination. The change of the degree name from Laurea Specialistica into Laurea Magistrale was agreed upon in 2004.

A limited number of 2nd cycle programmes, namely those leading to professions regulated by EU sectoral directives (in dentistry, human medicine, pharmacy, veterinary medicine, architecture), are defined "one long cycle degree programmes" (Corsi di Laurea Specialistica/Magistrale a ciclo unico-CLSU/CLMU); they differ from the majority of usual CLS/CLM in the following characteristic features: access is by the Italian school leaving diploma or a foreign comparable qualification; admission is always subject to entrance exams; curricula consist of just one long cycle of 5-6 years (at present, only the CLSU/CLMU in human medicine takes 6 years), and a total number of 300-360 ECTS credits. All LS/LM and LSU/LMU allow transition to the labour market, access to the civil service and/or regulated professions; they also grant access to research doctorate programmes as well as to all other degree courses of the 3rd cycle.

B) CMU1 consist in advanced scientific courses or higher continuing education studies, open to the holders of a Laurea-L or a foreign comparable degree; admission may be subject to additional conditions. Course length is min. 1 year. The degree Master Universitario di 1° livello-MU1 (1st level university master) is awarded to graduates who have earned 60 credits at least. The MU1 does not give access to DR programmes nor to other 3rd cycle degree courses.

Matricola: **5101735**

Protocollo: **0403237**

Diploma supplement: **FACCIO CHRISTIAN**

Third cycle. It covers the following typologies of degree courses: A) Corsi di Dottorato di Ricerca-CDR (research doctorate programmes); B) Corsi di Specializzazione-CS (specialisation courses); C) Corsi di Master Universitario di 2° livello-CMU2 (2nd level university master courses).

A) CDR aim at training postgraduates for very advanced scientific research or for professional appointments of the highest consequence; they envisage the use of suitable teaching methodologies such as updated technologies, study periods abroad, stages in specialistic research centres. Access is by an Italian 2nd degree (LS/LM) or a foreign comparable degree; admission is subject to the passing of very competitive exams; legal length must be min. 3 years; the drawing up of an original dissertation is necessary for the awarding of the 3rd degree called Dottorato di Ricerca-DR (research doctorate); the corresponding personal title is Dottore di Ricerca.

B) CS are devised to provide postgraduates with knowledge and abilities as requested in the practice of highly qualifying professions; the majority concerns medical, clinical and surgical specialities, but CS have been also established for the advanced education and professional training in different contexts. CS may be established exclusively in application of specific Italian laws or EU directives. Access is by an LS/LM or by a foreign comparable degree; admission is subject to the passing of a competitive examination; course length is min. 2 years. The final degree, called "Diploma di Specializzazione"-DS, give the right to the title as "Specialista".

C) CMU2 consist in advanced scientific courses or higher continuing education studies, open to the holders of an LS or a foreign comparable degree; admission may be subject to additional conditions. Studies take min. 1 year. The degree (Master Universitario di 2° livello-MU2) is awarded to postgraduates who have earned min. 60 credits.

Credits: degree courses are usually structured in credits (crediti formativi universitari - CFU). A university credit generally corresponds to 25 hours of global work per student, time for personal study included. The average workload of a full time student is conventionally fixed at 60 credits/year.

Classes of Degree Courses: all CL and CLS/CLM sharing the same educational objectives and the same fundamental types of teaching-learning activities are organised in groups called "classi di appartenenza" (classes of degree courses). The content of individual degree courses is autonomously determined by universities; however, when establishing a CL or a CLS/CLM, individual institutions have to adopt some general requirements fixed at national level. Degrees belonging to the same class have the same legal validity.

Academic Titles: the latest university legislation has defined the academic titles corresponding to the degrees of the Bologna sequence. The L entitles to be called "Dottore", the holders of an LS/LM have a right to the title as "Dottore Magistrale", the DR attributes the title as "Dottore di Ricerca".

Joint Degrees: Italian universities are allowed to establish all the degree programmes in cooperation with foreign partner universities, both European and non-European; they may therefore design integrated curricula on completion of which joint or double/multiple degrees are awarded.
