OBJECTIVE STATEMENT

Striving to give my contribution to the world of Artificial Intelligence, I am a MSc graduate in Data Science and Artificial Intelligence with a strong background in economics and data analysis. Passionate about robotics perception and navigation in particular, my dream is to help shape the future I could only imagine as a kid. I am dynamic, strongly motivated and always seeking for challenges, where I can prove myself and learn more.

EDUCATION

Double Degree in Artificial Intelligence
Universitat d'Alacant
Sep 2025 – Jan 2026 Alicante, Spain

Master's Degree in Data Science and Artificial Intelligence
Università degli Studi di Trieste
Oct 2024 – Sep 2026 Trieste, Italy

Bachelor's Degree in Economics
Università Cattolica del Sacro Cuore
Oct 2021 – Jul 2024 Milan, Italy

Diploma in Scientific High School
Liceo Scientifico G.G.Trissino
Sep 2016 – Jul 2021 Valdagno, Italy

EXPERIENCES

AI Engineer Intern
AI Lab
Jun 2025 – Oct 2025 Trieste, Italy

- Worked on a RAG agent able to perform semantic search and respond to medical questions about cardiological guidelines.
- Built using LangChain, QDRant and Chainlit.
- Developing strong skills in group work, using Git and GitHub for version control and collaboration.

Waiter
Locanda Mezzo Cason
August 2021 - April 2025 Recoaro Terme, Italy

- Worked as a waiter in a restaurant, where I developed strong communication and teamwork skills.
- Gained experience in managing customer relations and providing high-quality service.
- Developed the ability to work under pressure and handle multiple tasks.

Volunteer
Associazione Paolo Pini
Dec 2021 – Jun 2023 Milan, Italy

TOP PROJECTS

Underwater Search and Navigation in Unknown Environment
MSc Thesis focused on the development and analysis of a MARL algorithm for effective search in an unknown underwater environment.

Parallel ICP Registration
Parallel implementation of the ICP algorithm used for registration using a kd-tree, both on CPU and GPU.

Chess Game
Developed a complete chess game in C++ with a GUI using Streamlit and Python. Also developed an agent able to solve simple KRvK endgames using Reinforcement Learning algorithms.

Fish Detection
A robust computer vision pipeline for underwater fish analysis. It uses a YOLOv8 model for stable, real-time tracking and classification.
